Your moving Morgul spy in Minas Tirith reports; "Out of the sky they came, nine pellets of flight. As they swooped on over the city with anti-aircraft(?) spears bursting about them, each dropped a separate payload, and SPLAT all over the clean streets. 'May Nazgul dung infest and smell up this city for years on end'. A scritch went up from the sky and all who heard it took a deep breath and cried a great victory for the Dark Lord!!!!" Voluntas; At the least, dropping it on Minas Tirith will improve the smell in Barad-Dur.

If there, time for a short review.

Recently, I was sent from the 'Institute for Diplomatic Studies', Larry Peery's handbook on the strategy and tactics of England in Diplomacy games. Larry has also produced a handbook for Austria at this date. If the reader has seen either handbook, then one will realize the amount of work and information to be found therein. A novice player would learn a great deal though the novice could easily have most of the book go in one ear and out the other. He all learned the hard way (by experience) didn't we. The intermediate player can also pick up a tip here and there, especially on mid-game and end-game struggles. The experienced player will find little to amuse him but then these handbooks weren't intended for him. I wouldn't recommend the IDA players handbook, tho I'm inclined to endorse Peery's handbooks. If only for the basic strategy and tactics of a great power, Larry's books will provide you with the facts in a more comprehensive fashion than any other publication.
